RYAN PRAYOGA

Full Stack Developer & Team Lead

Tangerang, Banten | developer@ryanprayoga.dev | +62 83878727519 | linkedin.com/in/ryanprayogaaa | github.com/ryan-prayoga | ryanprayoga.dev

PROFESSIONAL SUMMARY

Full Stack Developer and Team Lead with 4+ years of experience shipping production web and mobile systems for government (R&D/BUMN) and enterprise clients. Led a 5-person engineering team (2 FE, 2 BE) across 3–5 concurrent projects, while staying hands-on in Go, SvelteKit, Laravel, Nuxt, and Flutter with PostgreSQL, Redis, and microservices. Also builds open-source AI/LLM developer tooling and runs its own VPS infrastructure and CI/CD pipelines.

SKILLS

- **Primary:** Go • TypeScript / JavaScript • Svelte (SvelteKit) • Laravel / PHP • Nuxt.js • Flutter • Tailwind CSS
- **Systems, Backend & Data:** Rust (Tauri v2) • Swift (SwiftUI) • PostgreSQL (incl. PostGIS) • MySQL • Redis • Docker • SSE / WebSocket • gRPC
- **AI Agents & Tooling:** AI agent design engines (native-design); agent orchestration pipelines; MCP server integration; prompt engineering & AST analysis
- **DevOps & Infrastructure:** Caddy, Nginx, PM2, GitHub Actions, GitLab CI, Linux (Ubuntu/Debian), VPS hardening, WireGuard
- **Tools & Practices:** Git, GitLab, GitHub, Jira, Postman, Bruno, Figma, Agile/Scrum, code review, mentoring

PROFESSIONAL EXPERIENCE

Freelance Fullstack Developer

Putra Selamat Makmur — Tangerang, Indonesia | May 2026 – October 2026 (6 months)

Delivered an end-to-end company profile and internal management web application for an industrial forklift-service client (Putra Selamat Makmur). Scoped, architected, shipped, and SEO-tuned from scratch.

- Architected and delivered an end-to-end industrial service platform with SvelteKit, TypeScript, and Tailwind CSS, achieving a 95+ mobile Lighthouse score and sub-second load times.
- Engineered high-performance Go backend services deployed on Linux VPS with Caddy reverse proxy, ensuring zero-downtime delivery and atomic operations for invoicing and job dispatch.
- Implemented interactive service catalog and WhatsApp business inquiry routing, transforming manual paper logs into streamlined digital operations and boosting lead conversion.
- Optimized Schema.org structured data and Local SEO, securing top search engine rankings in the target industrial service market.

Team Lead & Fullstack Developer

PT Traspac Makmur Sejahtera — Jakarta, Indonesia | September 2024 – May 2026 (1 year 8 months)

Led a 5-person engineering team (2 FE, 2 BE) in an R&D division. Main technical PIC across concurrent projects — responsible for architectural decisions, development, and long-term maintenance.

- Mentored 3 engineers to concrete career outcomes: one converted from contract to permanent employee, one promoted a grade after a long plateau, and one secured an approved salary increase.
- Introduced AI-assisted development practices to the team and coached engineers on presenting project demos, speeding up delivery with fewer bugs.
- Resolved a slow data-loading bottleneck on a government project through code optimization and database indexing.
- Kept 3–5 concurrent confidential government projects on track, adjusting priorities to team capacity and stakeholder needs.
- Established code review practices and coding standards, and managed weekly sprints across frontend and backend teams.
- Acted as the main bridge between the team and stakeholders, from scoping requirements to delivery updates.

Fullstack Developer

PT Traspac Makmur Sejahtera — Jakarta, Indonesia | April 2022 – September 2024 (2 years 5 months)

Built production web and mobile applications for government agencies and state-owned enterprises (BUMN) in an R&D division. Promoted to Team Lead in September 2024.

- Architected and maintained 5+ microservices (identity management, learning platform, document processing) handling datasets from hundreds of thousands to 1M+ records.

- Optimized complex database queries and integrated Redis caching, cutting average API latency by ~40% across high-volume transactional workflows.
- Engineered enterprise SSO and biometric multi-factor authentication (MFA) architectures, securing critical government and BUMN platforms.
- Developed cross-platform mobile applications with real-time features (GPS tracking, WebSocket notifications, live chat), maintaining high reliability in low-bandwidth environments.
- Automated asynchronous PDF report and certificate generation pipelines, slashing batch processing time from minutes to sub-second per record.
- Managed Linux VPS cloud infrastructure and established CI/CD automation (GitHub Actions, GitLab CI), reducing release deployment cycles by 60% with zero downtime.

SELECTED PROJECTS

All projects are open source or live in production — source code at github.com/ryan-prayoga

- **WhatsApp Desk (Rust)** — Ultra-lightweight multi-platform desktop WhatsApp client built with Rust and Tauri v2 — slashing RAM usage from 1.5GB to ~18MB with zero-GC runtime. Source: github.com/ryan-prayoga/whatsapp-desktop-rust
- **Kas Badminton** — Real-time sports club cash & match manager. Go + SvelteKit + PostgreSQL, SSE, dynamic QRIS, offline-first PWA, single Go binary delivery via go:embed. Live at kasbadminton.com
- **native-design** — Open-source design intelligence engine and CLI for AI coding agents enforcing authentic native OS guidelines (Apple, Google, Microsoft, Linux). Source: github.com/ryan-prayoga/native-design
- **Pantau Anggaran** — Public budget monitoring platform tracking 3M+ government procurement records. Go API + SvelteKit, PostgreSQL 16 + PostGIS, deployed on VPS with CI, live at pantauanggaran.ryanprayoga.dev
- **Putra Selamat Makmur** — Company profile + internal admin for an industrial forklift-service client. SvelteKit + Tailwind + Go + Caddy, live at putraselamatmakmur.com

EDUCATION

- **Bachelor of Informatics Engineering —** Universitas Pasundan (UNPAS), Bandung, Indonesia | Expected: February 2027 (Undergraduate)
- **Software Engineering —** SMK Negeri 5 Kab. Tangerang, Banten, Indonesia | Graduated: 2020

LANGUAGES

- **Bahasa Indonesia —** Native
- **English —** Conversational (strong technical reading, writing & listening)
