

RYAN PRAYOGA

Full Stack Developer

Tangerang, Banten | developer@ryanprayoga.dev | +62 83878727519 | linkedin.com/in/ryanprayogaaa | github.com/ryan-prayoga | ryanprayoga.dev

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building and shipping production web and mobile applications for enterprise, government, and self-built products. Strong architectural foundation across Go, SvelteKit, Laravel, and Flutter on the frontend/mobile side, paired with PostgreSQL, Redis, and microservices on the backend. Actively builds AI/LLM developer tooling, explores agent frameworks, and integrates modern AI workflows. Proven track record managing cloud VPS infrastructure, CI/CD automation, legacy stack modernization, and leading projects end-to-end with high performance and reliability.

SKILLS

- **Primary:** Go • TypeScript / JavaScript • Svelte (SvelteKit) • Laravel / PHP • Flutter • Tailwind CSS
- **Systems, Backend & Data:** Rust (Tauri v2) • Swift (SwiftUI) • PostgreSQL (incl. PostGIS) • Redis • Docker • SSE / WebSocket • gRPC
- **AI Agents & Tooling:** AI agent design engines (native-design); agent orchestration pipelines; MCP server integration; prompt engineering & AST analysis
- **DevOps & Infrastructure:** Caddy, Nginx, PM2, GitHub Actions, GitLab CI, Linux (Ubuntu/Debian), VPS hardening, WireGuard
- **Tools & Practices:** Git, GitLab, GitHub, Jira, Postman, Bruno, Figma, Agile/Scrum, code review, mentoring

PROFESSIONAL EXPERIENCE

Freelance Fullstack Developer

Putra Selamat Makmur — Tangerang, Indonesia | May 2026 – Present (5 months)

Delivered an end-to-end company profile and internal management web application for an industrial forklift-service client (Putra Selamat Makmur). Scoped, built, shipped, and SEO-tuned from scratch.

- Architected and developed high-performance web platform using SvelteKit, TypeScript, and Tailwind CSS
- Engineered backend services in Go and deployed on Linux VPS with Caddy reverse proxy for zero-downtime static delivery
- Implemented interactive service catalog, WhatsApp business inquiry routing, and verified client portfolio showcase
- Optimized local SEO, OpenGraph metadata, and Schema.org structured data, achieving top search visibility and sub-second page loads

Fullstack Developer

PT Traspac Makmur Sejahtera — Jakarta, Indonesia | April 2022 – May 2026 (4 years 2 months)

Built production web and mobile applications for government agencies and state-owned enterprises in an R&D division. Main PIC across multiple concurrent projects — responsible for architecture decisions, development, and long-term maintenance.

- Built and maintained microservice-based systems across identity management, learning platforms, and document processing
- Handled API integration and data processing with datasets from hundreds of thousands to millions of records
- Implemented SSO and multi-factor authentication (including biometric) for enterprise applications

- Developed mobile applications with real-time features: notifications, GPS tracking, and live chat
- Built automated document generation pipelines for certificates and PDF reports
- Managed VPS infrastructure, set up CI/CD pipelines, and led legacy stack modernization
- Kept 3–5 concurrent projects on track, maintaining code review practices and coding standards

SELECTED PROJECTS

All projects are open source or live in production — source code at github.com/ryan-prayoga

- **WhatsApp Desk (Rust)** — Ultra-lightweight multi-platform desktop WhatsApp client built with Rust and Tauri v2 — slashing RAM from 1.5GB to ~18MB with zero-GC runtime. Source: github.com/ryan-prayoga/whatsapp-desktop-rust
- **Kas Badminton** — Real-time sports club cash & match manager. Go + SvelteKit + PostgreSQL, SSE, dynamic QRIS, offline-first PWA, single Go binary delivery via go:embed. Live at kasbadminton.com
- **native-design** — Open-source design intelligence engine and CLI for AI coding agents enforcing authentic native OS guidelines (Apple, Google, Microsoft, Linux). Source: github.com/ryan-prayoga/native-design
- **Pantau Anggaran** — Public budget monitoring platform for 3M+ government procurement records. Go API + SvelteKit, PostgreSQL 16 + PostGIS, deployed on VPS with CI, live at pantauanggaran.ryanprayoga.dev
- **Putra Selamat Makmur** — Company profile + internal admin for an industrial forklift-service client. SvelteKit + Tailwind + Go + Caddy, live at putraselamatmakmur.com
- **OpenRowDB** — Native macOS database client for Postgres and MySQL. Swift + SwiftUI, no Electron/JVM. Source: github.com/ryan-prayoga/openrowdb
- **JEDUG** — Civic-tech platform where citizens report and track damaged public infrastructure. Go backend + SvelteKit frontend, PostgreSQL + PostGIS, live at jedug.id

EDUCATION

- Bachelor of Informatics Engineering — Universitas Pasundan (UNPAS), Bandung, Indonesia | Expected: November 2026 (Undergraduate)
- Software Engineering — SMK Negeri 5 Kab. Tangerang, Banten, Indonesia | Graduated: 2020

LANGUAGES

- Bahasa Indonesia — Native
- English — Conversational (strong technical reading, writing & listening)
